

Location: Lombok, Indonesia. HTH member from a volunteer program in Australia for a week long sojourn in Indonesia. HTH member hailed from Fredericksburg, VA but had been stationed in Darwin doing volunteer work.

Product Purchased: TravelGap® Excursion

Medical Situation: 18 year old member was hit by a motor vehicle. Given the extent of injuries, member was immediately admitted to a local hospital for stabilization.

Diagnosis: Open fracture of right lower leg; immediate surgery required

Action: Upon member's admission to the hospital, HTH Worldwide's Chief Medical Director consults with the attending physician. Due to the serious nature of injuries and lack of appropriate medical resources in Lombok, medical evacuation via Air Ambulance is arranged to Singapore. Hospital Admission in Singapore at Mt. Elizabeth Hospital, a leading facility, is arranged by HTH's medical assistance team. HTH pays directly for all medical bills in Indonesia and Singapore.

A bedside visit benefit is coordinated by HTH and the patient's mother travels to meet member in Singapore. HTH continues medical monitoring throughout hospital stay, obtaining daily medical updates on patient to ensure appropriateness of care.

Outcome: Once the member had been medically approved to fly, the member is returned to Australia to continue working with the volunteer program. HTH arranged and paid for transportation and upgraded seating to Australia and the necessary physical therapy received there.
